

## Week 1: Coding Assignment

**URL to GitHub Repository:** [Cbrumett1/Week-03-Git-assignment \(github.com\)](https://github.com/Cbrumett1/Week-03-Git-assignment)

**URL to Your Coding Assignment Video:** [Pushing files from CLI to GitHub - YouTube](#)

After watching the video, *Source Control with git*, you should have already set up a GitHub account for this program.

If you have **not** setup your GitHub account, **review the above video in the Week 3: Weekly Videos and Curriculum** and set your account up before proceeding with this assignment.

### Instructions:

- Create a new repository on GitHub for this week's assignments and push this document, and any files that you have created to the repository.
- Include the URLs for this week's repository and video where instructed.
- Submit this document as a .PDF file in the LMS.

### Assignment Steps:

- The link below has a zipped file that contains an empty directory (folder) for your assignments.
- Download the file to your computer and unzip it.
- This directory (folder) should be used to organize each week's projects in the course.

[https://drive.google.com/file/d/1WDc\\_WJ8I0MfwbrbmtMsxHdTpupZsPjXT/view](https://drive.google.com/file/d/1WDc_WJ8I0MfwbrbmtMsxHdTpupZsPjXT/view)

**Note:** In the following Git/GitHub Tutorial, a file is created in **Terminal** (on a Mac) using **touch filename**

To do the same thing in **Command Prompt** (on Windows), use the following command:

(Windows or Mac) **echo "text-to-put-into-file" > filename**

- Following the Git/GitHub tutorial in your week 0 video:
  - Create a directory (folder) inside **Week 03** directory
  - Create a repository on the GitHub website.
  - **Push** your directory of files to GitHub as instructed in the video.
  - After your first push, please ensure that you make some changes to your directory (folder), such as adding a new file or changing your code.
  - **Push** those changes to your repository a second time (as shown in the video).

# PROMINEO TECH

## Week 1: Coding Assignment

- When complete, paste a screenshot of your terminal or command prompt that shows the commands above completed.

```
C:\Users\codyb\Week-03-Git-Assignment>git push -u origin main
Enumerating objects: 3, done.
Counting objects: 100% (3/3), done.
Writing objects: 100% (3/3), 239 bytes | 239.00 KiB/s, done.
Total 3 (delta 0), reused 0 (delta 0), pack-reused 0
To https://github.com/Cbrumett1/Week-03-FE-Central.git
 * [new branch]      main -> main
branch 'main' set up to track 'origin/main'.

C:\Users\codyb\Week-03-Git-Assignment>type nul > week03Lab.js

C:\Users\codyb\Week-03-Git-Assignment>type nul > week03Lab.html

C:\Users\codyb\Week-03-Git-Assignment>git status
On branch main
Your branch is up to date with 'origin/main'.

Untracked files:
  (use "git add <file>..." to include in what will be committed)
    week03Lab.html
    week03Lab.js

nothing added to commit but untracked files present (use "git add" to track)

C:\Users\codyb\Week-03-Git-Assignment>git add .

C:\Users\codyb\Week-03-Git-Assignment>git status
On branch main
Your branch is up to date with 'origin/main'.

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
    new file:   week03Lab.html
    new file:   week03Lab.js
```

### Video Steps:

## Week 1: Coding Assignment

- Create a video, up to five minutes max, showing and explaining exactly what you did for this assignment Git/GitHub.
- This video should be done using screen share and voice over.
- This can easily be done using Zoom, although you don't have to use Zoom, it's just what we recommend.
  - You can create a new meeting, start screen sharing, and start recording.
  - This will create a video recording on your computer.
- This should then be uploaded to a publicly accessible site, such as YouTube.
  - Ensure the link you share is **PUBLIC** or **UNLISTED**!
  - If it is not accessible by your grader, your project will be graded based on what they can access.
